

Mine Camp Water Supply Pumps Delivered in One Week

“ We didn’t know that it could be so easy to install a pressure system! When it turned up, it was “all hands on deck” and we had it running in no time at all!

THE CHALLENGE

The customer needed a dual variable speed pumpset delivered to the mining site within 8 days, ready for the 300 people moving in the following day. Pump duty was 5 litres per second at 500 kPa.

THE SOLUTION

All Pumps was able to offer a Javelin pressure system. Comprising of dual Javelin vertical multistage pumps, Vasco variable speed controllers, stainless steel suction and discharge manifolds all mounted on a galvanised steel baseplate. All Pumps had the Javelin pumps, Vasco variable speed controllers and the stainless steel manifolds in stock. The entire Javelin Dual Pump pressure system, already programmed, tested and manifolded ready to connect to power and the suction and discharge pipework on site was delivered on the 8th day after receiving the order, in time to support the 300 people moving into the mining camp the next day.
